

All Season Lawn Care Application Guide

Produced Locally Since 1956

Arthroban Lawn Care Program

TURF LINE Crabgrass Preventer Plus 22-0-8 Fertilizer

- Pre-emergence control of crabgrass and many other annual weeds.
- For best results activate with 0.5" of water or rainfall after application.
- Apply any time in April through Mid-May.
- Wait 4 months after application before reseeding treated area.

1 APR. MAY JUNE JULY AUG. SEPT. OCT. NI
Best Time to Apply - Early April to Mid-May

TURF LINE Dissolve® Weed Killer Plus 22-0-8 Fertilizer

- Controls dandelions and other broadleaf weeds.
- For best results:
 - Apply when weeds are actively growing.
 - Avoid mowing 1 to 2 days before and after application.
 - Apply when grass is moist after a rain, sprinkling or dew.
 - Avoid applying if rainfall is expected within 48 hours of application.
- Do not apply to newly seeded areas. Do not reseed for at least 3 or 4 weeks after application.

2 APR. MAY JUNE JULY AUG. SEPT. OCT. NOV.
Best Time to Apply - Mid-May to End of June

TURF LINE Arthroban Plus 21-0-5 Fertilizer

- Feeds and protects in one application.
- Kills grubs and protects against European Crane Fly Larvae.
- UFLEXX Stabilized Nitrogen feeds for up to 8 weeks, won't burn grass.
- Activate with 0.5" of water or rainfall after application.

3 APR. MAY JUNE JULY AUG. SEPT. OCT. NOV.
Best Time to Apply - Mid-July to Late August

TURF LINE 18-0-12 Winterizer Fertilizer Plus Dissolve® Weed Killer

- Controls viney and broadleaf weeds.
- It encourages root development and thickens turf without excessive leaf growth. This enables the lawn to better withstand the rigors of winter for a beautiful weed-free spring lawn.

4 APR. MAY JUNE JULY AUG. SEPT. OCT. NOV.
Best Time to Apply - September to Mid-October
